

World's FIRST Machine Readable Lockout Tag

STANDARDIZING YOUR LOCK-
OUT TAGOUT PROCEDURES

NMC's Smart Tagnology™ creates machine-readable lockout tags using Radio Frequency Identification (RFID) and bar code technology to eliminate confusion and improve communication among maintenance and production personnel. In conjunction with N4's Field ID system, you can standardize and automate your lockout procedures and instantly share information throughout a plant and across facilities. Smart Tagnology offers the ability to remotely view the status of locked out equipment improving productivity, minimizing equipment down time, significantly reducing both lost time and insurance costs.
