

Traffic Signs

Are your traffic signs compliant?

Great for long term outdoor use.

On January 22, 2008, MUTCD (Manual for Uniform Traffic Control Devices) released a new regulation stating that traffic signs and pavement markings on all roads open to public traffic must have increased reflectivity.

All regulatory, warning and ground-mounted signs must meet reflectivity requirements by January, 2015. NMC carries a variety of materials for traffic signs, including a high intensity reflective aluminum and a fluorescent yellow micro-prismatic reflective material.
