

Protect your personnel with National Marker's Arc Flash Labels.

National Marker's Arc Flash labels identify arc flash and shock hazards and the personal protection equipment required to keep you and your employees safe. Compliant with NEC Standard, Article 110.16, National Marker's Arc Flash Labels list warnings, procedures, and equipment required when working on a power board, control panel, or switchboard with the potential to create an arc flash.

NEC Standards are enforced by local electrical inspectors, fire marshals and OSHA under the General Duty Clause.

the custom possibilities are endless! contact us for more information:
