NATIONAL MARKER INTRODUCES IMO COMPLIANT SIGNS

North Smithfield, RI – The International Maritime Organization (IMO) regulates international symbols used by the maritime industry. Labeling fire and life saving equipment with international graphics aid passengers and crew to quickly locate the proper equipment in the event of an emergency or evacuate their vessels. National Marker's IMO signs are photo-luminescent for easy viewing in low light or dark conditions for more than six hours; in addition, these signs come laminated for use in all-weather conditions.

National Marker has many different symbols for fire fighting and life saving equipment. In addition to these symbols, National Marker will also work with you to add letters and numbers to identify those evacuation points.
